

O6 WetLine now with IO-Link!

Small and compact photoelectric sensors now also as IO-Link versions!

- Stainless steel housing with protection rating IP 68 / IP 69K
- Diffuse reflection sensors with reliable background suppression
- Well-defined light spot for precise object detection, no scattered light
- Also available as through-beam or retro-reflective system
- Many functions can be set via IO-Link, e.g. range and sensitivity

Best performance

The diffuse reflection sensors distinguish themselves by reliable background suppression, even in case of highly reflective backgrounds.

A special feature is the automatic switch point adjustment that guarantees reliable operation even in steam, smoke or highly reflective environments.

The WetLine series features a particularly robust stainless steel housing with protection rating IP 68 / IP 69K. The potentiometer with double sealing ensures maximum ingress resistance. The flush front lens ensures cleaning without residues.

IO-Link

The O6 WetLine sensors are now also available as versions with IO-Link. Via this interface, the user can set range, sensitivity, light-on / dark-on mode, switching delay or deactivation of the operating elements.
