

Remark

You will find instructions, technical data, approvals and more information using the QR code on the unit / packaging or at www.ifm.com.

Safety instructions

- Read the instructions before setting up the product.
- The product must be suitable for the corresponding applications and environmental conditions without any restrictions.
- Only use the product for its intended purpose.
- If the operating instructions or the technical data are not adhered to, personal injury and/or damage to property may occur.
- The manufacturer assumes no liability or warranty for any consequences caused by tampering with the product or incorrect use by the operator.
- Installation, electrical connection, set-up, operation and maintenance of the unit must be carried out by qualified personnel authorised by the machine operator.
- Protect units, cables and accessories against damage.

► Only use accessories from ifm electronic.

When components from other manufacturers are used ifm electronic does not ensure optimum function.
